

CLAIMS

What is claimed is:

1. Protection gear against harmful insects comprising:

a protection net made of ventilative cloth, woven fabric, or nonwoven fabric, the protection net being worn to cover the head, trunk, arms, hands, legs, and feet of the human body; and

a fastener for fastening the protection net to the human body.

2. The protection gear against harmful insects according to claim 1, wherein the protection net comprises an insecticide cap for covering the head, an insecticide mask for covering the face, an insecticide upper garment for covering the trunk, a mantle with a cap, insecticide sleeves for covering the arms, wristlets, insecticide gloves for covering the hands, insecticide trousers for covering the legs, insecticide anklets for covering the ankles, and insecticide shoes, socks, or stockings for covering the feet or shoes, and is made in the form of mosquito net clothes, clothes of ramie cloth, clothes of hemp cloth, shoulder strap, waistcoat, overskirt with slits, belt, or wrist strap, and

the fastener is a string, an elastic band, a button, or a velcro tape.

3. The protection gear against harmful insects according to claim 1, wherein the protection net is comprised of a frame made of a flexible elastic band having elasticity sufficient to be separated from the human body by a predetermined distance; and an adhesive net adhered to the frame, the adhesive net being made into a close net form sufficient for ventilation and prevention of the invasion of harmful insects including flies, mosquitoes, ants, ticks, and fleas, and being treated with an insecticide and/or repellent.

4. The protection gear against harmful insects according to claim 3, wherein the adhesive net is a disposable adhesive net having one adhesive surface so that while it adheres to a base paper, it adheres to the frame after being removed from the base paper when used.

5. The protection gear against harmful insects according to claim 4, wherein the other surface of the protection net that is exposed is sticky so that harmful insects can be captured, and the sticky surface contains an attractant and/or an insecticide and/or a repellent.

6. The protection gear against harmful insects according to claim 1, wherein both surfaces or one surface of the protection net are/is coated with an

YPL-PT020

insecticide and/or a repellent using a binder, and the insecticide and/or repellent is coated directly or is coated after encapsulated.
